

## Annual return graph

This shows the return after fund charges and tax for each complete year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 March 2017.

**Important:** This does not tell you how the fund will perform in the future. Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

### What fees are investors charged?

Investors in the Russell LifePoints® Conservative Fund are charged fund charges. In the year to 31 March 2017, these were:

	% of net asset value
<b>Total fund charges</b>	<b>1.40%</b>
Which are made up of -	
<b>Total management and administration charges including:</b>	
Manager's basic fee	1.05%
Other management and administration charges	0.35%
<b>Total performance based fees</b>	<b>0.00%</b>
<b>Other charges</b>	
* Annual membership fee	\$33.10

\* Annual membership fee calculation involves calculating the total of member fees payable across all those participating employers where the member pays for the fees, and dividing by the total number of members from all participating employers, and multiplying by 12 to convert to an annual average.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the 'Fee and other charges' document on the entry relating to the offer of interests in the Aon Master Trust maintained on the offer register <http://www.business.govt.nz/disclose> for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

### Example of how this applies to an investor

Jacob had \$10,000 in the fund at the start of the year and didn't make any further contributions. At the end of the year, Jacob received a return after fund fees and tax were deducted of \$438 (that's 4.38% of his initial \$10,000). Jacob also paid \$33.10 in membership fees. This gives Jacob a total return of \$404.90 for the year.

## What does this fund invest in?

### Actual investment mix

This shows the type of assets that the fund invests in.

### Target investment mix

Cash and cash equivalents	0.00%
