# Investment Commentary April 2022

## Market Summary

In retaliation to the Russian invasion, the US imposed sanctions on Sberbank and Alfa-Bank, Russia's largest financial institution and private bank, respectively. The European Union and Japan also imposed a ban on Russian coal imports. The G7 nations also rejected the demand for the payment of Russian gas in roubles.

The International Monetary Fund (IMF) downgraded its global growth forecast for 2022 to 3.6% from the previous 4.4%. The IMF warned that growth would suffer from higher inflation due to Russia's invasion of Ukraine.

According to the Federal Open Market Committee's latest meeting minutes, the US Federal Reserve (Fed) will start reducing the size of its \$9tn balance sheet by \$95bn a month. The Fed will reduce holdings by \$60bn in Treasuries, and \$35bn in mortgage-backed securities phased in over three months. Fed chair, Jay Powell, also signalled that the Fed is prepared for a 50 basis point rate hike in May to tackle soaring inflation.

European Central Bank (ECB) policymakers held contrasting opinions on tackling surging inflation, as indicated in the minutes of their latest meeting. Some ECB rate setters wanted "a firm end date" on net bond purchases and more of an indication on interest rate hikes in the summer, whilst others opted for a "wait and see" approach over geopolitical uncertainty.

French incumbent president Emmanuel Macron defeated his far-right rival, Marine Le Pen, after winning more than 58 percent of the vote and was re-elected for a second term as French president.

### Explanatory notes

1. Returns are before management fees and tax. All returns greater than 1 year have been annualised.
2. Overseas Sectors - returns are in NZ\$ and exclude the effects of currency hedging on equities, but include the effects of currency hedging on global property, global bonds and absolute return funds.
3. Property - the returns in this table are influenced by the allocation to direct investment and holdings in listed vehicles. In the case of direct investment, the valuation approach and timing adopted by the manager will influence the returns.
4. Risk Statistics (all are annualised using monthly data):  
Vol = Volatility = standard deviation of monthly fund returns  
VA = Value Added = Return (fund) minus Return (index)  
TE = Tracking Error = standard deviation of monthly Value Added  
IR = Information Ratio = Value Added divided by Tracking Error  
SR = Sharpe Ratio = [Return (fund) - Risk Free Rate]/ Volatility (Fund)
