Investment Commentary January 2023

Market Summary

According to the World Bank, the global economy is on a "razor's edge" of falling into recession this year, which it warned could easily materialise if financial conditions tighten. The Bank expects the global economy to grow by 1.7% in 2023, a sharp fall from the 2.9% estimated for 2022. It expects growth of 0.5% for advanced economies and 3.4% for the rest of the world over 2023.

The National Bureau of Statistics of China announced that China's economy grew by just 3% in 2022, sharply down from the 8.1% recorded in 2021 and amounting to the country's weakest growth since 1976 (except for 2020). China's economy has been impacted by a decline in exports, a weak property market, and the country's "zero covid policy" which was recently abandoned. Meanwhile, the US economy expanded by 2.9% year-on-year in the fourth quarter, slightly higher than economists' forecasts of 2.6% but lower than the 3.2% recorded in the previous quarter.

According to minutes from the US Federal Reserve's (Fed) December meeting, officials cautioned that "substantially more evidence" of easing inflation would be needed, in a reiteration of their intent to continue squeezing the economy. Officials warned that price pressures could "prove more persistent than anticipated".

The Bank of Canada became the first central bank in a G-10 economy to indicate a potential pause in its monetary tightening cycle, following emerging signs that the country's economy has cooled. The central bank increased its overnight rate by 25bps to 4.5%, the highest level since 2007.

Global equities delivered a positive return during January in NZ\$ terms, with the MSCI ACWI increasing by around 4.9% in NZ\$ terms on an unhedged basis. S&P/NZX 50 (with Imputation Credits) was up by 4.3% during same period. The ASX200 was up 6.2% in A\$ terms and is up by 12.2% over the last 12 months. The NZD has appreciated in value against the USD during January by 2.1%*.

The 10-year US treasury yield fell by 35bps to 3.53%. At the 10-year maturity, the German bund yield fell by 22bps to 2.31% and the French government bond yield fell by 30bps to 2.77%. US high yield bonds rose over the month, returning 3.9%. The US high yield bond spread over US treasury yields fell by 49bps to 430bps. The spread of USD-denominated EM debt over US treasury yields fell by 8bps to 455bps.

The Bloomberg Barclays Capital Global Aggregate Bond Index (NZD hedged) was up by 2.2% over the month. Returns on New Zealand Government Bonds were positive in January with the S&P/NZX Government Bond index increasing 2.1% for the month but is down by 6.2% over the year. The S&P/NZX A Grade Corporate Bond increased by 2.0% during January.

Explanatory notes

1. Returns are before management fees and tax. All returns greater than 1 year have been annualised.
2. Overseas Sectors - returns are in NZ\$ and exclude the effects of currency hedging on equities, but include the effects of currency hedging on global property, global bonds and absolute return funds.
3. Property - the returns in this table are influenced by the allocation to direct investment and holdings in listed vehicles. In the case of direct investment, the valuation approach and timing adopted by the manager will influence the returns.
4. Risk Statistics (all are annualised using monthly data):
Vol = Volatility = standard deviation of monthly fund returns
VA = Value Added = Return (fund) minus Return (index)
TE = Tracking Error = standard deviation of monthly Value Added
IR = Information Ratio = Value Added divided by Tracking Error
SR = Sharpe Ratio = [Return (fund) - Risk Free Rate]/ Volatility (Fund)
Wherever possible the risk statistics are calculated using each fund's actual benchmark.
