# Investment Commentary June 2022

## Market Summary

The US Federal Reserve (Fed) increased its benchmark interest rate by 75bps to a range of 1.50-1.75%, the largest rate increase since 1994. Fed chair Jay Powell indicated that a rate hike of 50bps or 75bps is also imminent at the July meeting. According to the median estimate on the Fed dot plot, officials expect the interest rate to reach 3.4% by the end of the year. The central bank downgraded growth forecasts to 1.7% from 2.8% for 2022 and expects core inflation to settle slightly higher at 4.3% by the end of the year.

The Bank of England (BoE) raised its benchmark interest rate by 25bps to 1.25%, its highest level in 13 years, elsewhere, the Bank of Canada (BOC) increased its benchmark overnight rate by 50bps to 1.5%.

Meanwhile, the European Central Bank (ECB) president Christine Lagarde signalled that the central bank might raise rates by 50bps in September "if the inflation outlook persists or deteriorates", in addition to a planned 25bps hike in July. The ECB indicated that it would flexibly invest the proceeds from its €1.7tn asset purchase program to support peripheral countries with wider spreads.

OPEC+ agreed to a larger than expected oil production increase due to surging energy prices. The group decided to increase production by 648,000 barrels per day for July and August.

In the latest G7 summit, members have agreed to explore the possibilities of putting a price cap on Russian oil to impair Moscow's ability to finance its conflict in Ukraine and curb soaring inflation.

Global equities delivered a negative return during June in NZ\$ terms, with the MSCI ACWI decreasing by around 4.1% in NZ\$ terms on an unhedged basis. ### Explanatory notes

1. Returns are before management fees and tax. All returns greater than 1 year have been annualised.
2. Overseas Sectors - returns are in NZ\$ and exclude the effects of currency hedging on equities, but include the effects of currency hedging on global property, global bonds and absolute return funds.
3. Property - the returns in this table are influenced by the allocation to direct investment and holdings in listed vehicles. In the case of direct investment, the valuation approach and timing adopted by the manager will influence the returns.
4. Risk Statistics (all are annualised using monthly data):  
Vol = Volatility = standard deviation of monthly fund returns  
VA = Value Added = Return (fund) minus Return (index)  
TE = Tracking Error = standard deviation of monthly Value Added  
IR = Information Ratio = Value Added divided by Tracking Error  
SR = Sharpe Ratio = [Return (fund) - Risk Free Rate]/ Volatility (Fund)  
Wherever possible the risk statistics are calculated using each fund's actual benchmark.
