Investment Commentary October 2023

Market Summary

The International Monetary Fund (IMF) kept the global growth forecast for 2023 unchanged at 3.0% but cut its 2024 forecast from 3.0% to 2.9%.

The European Central Bank (ECB) kept its interest rate unchanged at 4.0%, bringing an end to its unprecedented streak of 10 consecutive rate increases. The Governing Council signalled it will follow a data-dependent approach and is determined to bring inflation to its 2% target in a timely manner.

US headline inflation fell more than expected as the consumer price index (CPI) was up 3.2% year-on-year in October, down from 3.7% increase recorded in the previous month and marginally below economists' expectations of 3.3%. Core inflation also rose 4% year-on-year in October, slowing from the 4.1% recorded in September. Meanwhile, Eurozone headline inflation touched its lowest level in more than two years as the consumer price index (CPI) fell to 2.9% year-on-year in October, sharply down from the 4.3% recorded in September and lower than economists' expectations of 3.1%. Core inflation, which excludes volatile energy and food prices, also slowed to 4.2% in the year to October.

US-China trade tensions continued to rise as Biden's administration tightened export controls on cutting-edge artificial intelligence chip technology. In retaliation, China (a dominant producer and processor of natural graphite), now plans to restrict exports of three grades of graphite.

Global equities delivered a positive return during October in NZ\$ terms, with the MSCI ACWI increasing slightly by around 0.2% in NZ\$ terms on an unhedged basis. S&P/NZX 50 (with Imputation Credits) was down by 4.8% during same period. The ASX200 was down 3.8% in A\$ terms but is up by 3.0% over the last 12 months. Explanatory notes

- Returns are before management fees and tax. All returns greater than 1 year have been annualised.
- Overseas Sectors - returns are in NZ\$ and exclude the effects of currency hedging on equities, but include the effects of currency hedging on global property, global bonds and absolute return funds.
- Property - the returns in this table are influenced by the allocation to direct investment and holdings in listed vehicles. In the case of direct investment, the valuation approach and timing adopted by the manager will influence the returns.
- Risk Statistics (all are annualised using monthly data):
Vol = Volatility = standard deviation of monthly fund returns
VA = Value Added = Return (fund) minus Return (index)
TE = Tracking Error = standard deviation of monthly Value Added
IR = Information Ratio = Value Added divided by Tracking Error
SR = Sharpe Ratio = [Return (fund) - Risk Free Rate]/ Volatility (Fund)
Wherever possible the risk statistics are calculated using each fund's actual benchmark.
